## ABOUT ME

Passionate and results-driven Full Stack Developer with a Professional Diploma in Full Stack Development and hands-on experience in web application development, automation, and workflow integrations using Make.com. Skilled in designing scalable applications, integrating APIs, and automating business processes to save time and reduce manual work. Adept at both frontend and backend technologies with a commitment to clean code, agile development, and continuous learning.

## WORK EXPERIENCE

### IMARA SOFTWARE SOLUTION

Internship Trainee | 2025 ( JAN - MAY)

Created over 5+ automation workflows using Make.com for CRM, email campaigns, Google Workspace, and lead generation.

### FREELANCE FULL STACK DEVELOPER & AUTOMATION

Self-employed | 2022 – Present

- Built and deployed over 2+ full-stack web applications for clients using PHP, Laravel, and MySQL.
- Automated outreach and internal processes using Make.com
- Designed and implemented custom dashboards with user authentication and data visualization
- Integrated multiple third-party APIs for real-time data and automated workflows.

## PROJECTS

### 1. Student Registration System

- Full system for teachers to manage student data, attendance, and reports.
- Built with PHP, MySQL, Bootstrap. Admin and Teacher login included.

### 2. Automation for LinkedIn & Email Outreach

- Used Make.com + PhantomBuster + Google Sheets for fully automated lead generation.
- Tracked email opens, LinkedIn messages, and CRM updates automatically.

### 3. Delta Physics – Online Physics Learning Platform

- Developed a modern, interactive website for students to learn physics via lessons, quizzes, and video tutorials.
- Built using React.js for the frontend and Laravel for backend content management.
